Manage your uploaded contacts and call and text history

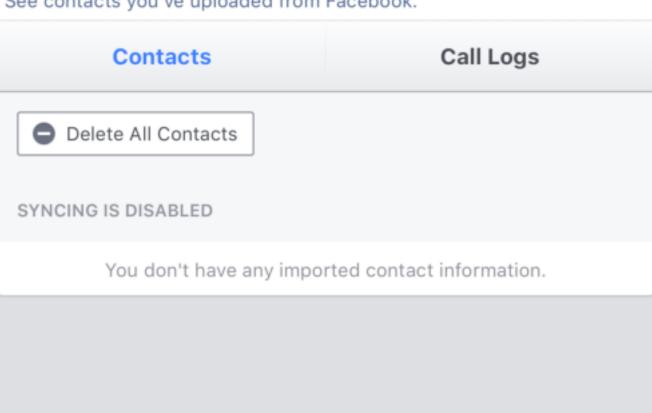

These are the contacts and call and text history that you've uploaded from Messenger. Information such as this helps Facebook and Messenger make better suggestions for you and others, and helps us provide a better service.

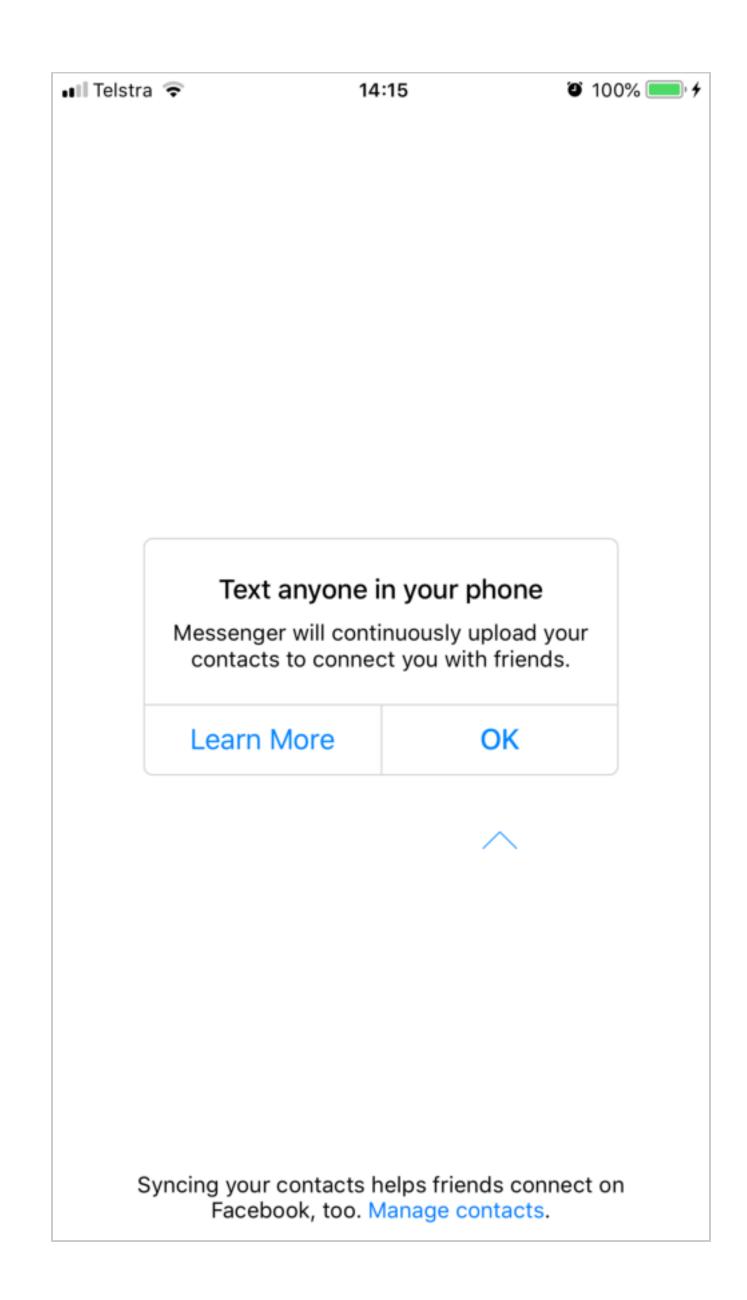

You may have uploaded information about these contacts beyond just the phone numbers below, such as nicknames. You can see this data by visiting our Help Centre.

To stop continuously uploading your contacts, turn off the "Sync contacts" setting in the Messenger app. To stop continuously uploading your call and text history, turn off the "Continuous call and SMS matching" setting. Turning off each setting will delete all of your previously uploaded contacts or call and text history from Messenger.

Bear in mind that if you delete the information on this screen but have continuous uploading still turned on for either setting, the information will be uploaded again automatically.

See contacts you've uploaded from Facebook.

Adding your contacts to Messenger

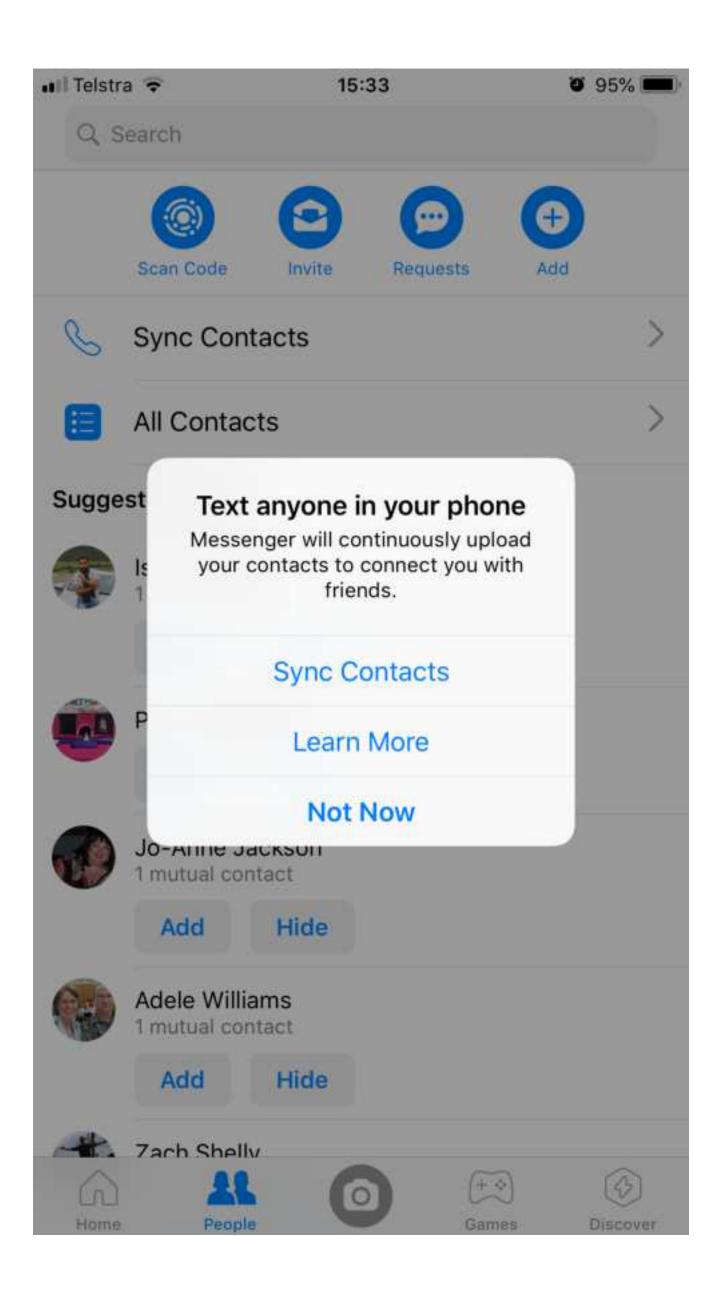

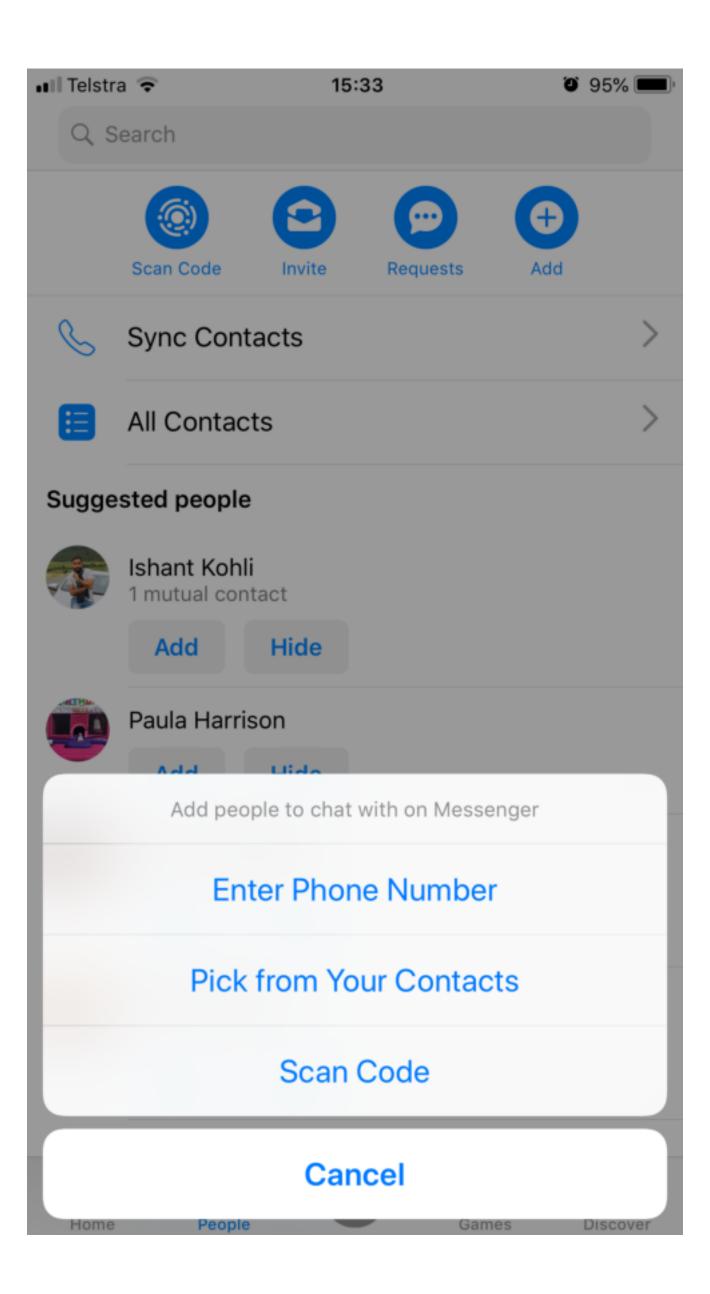

Messenger only works when you have people to talk to. Continuously uploading your contacts helps you connect with friends.

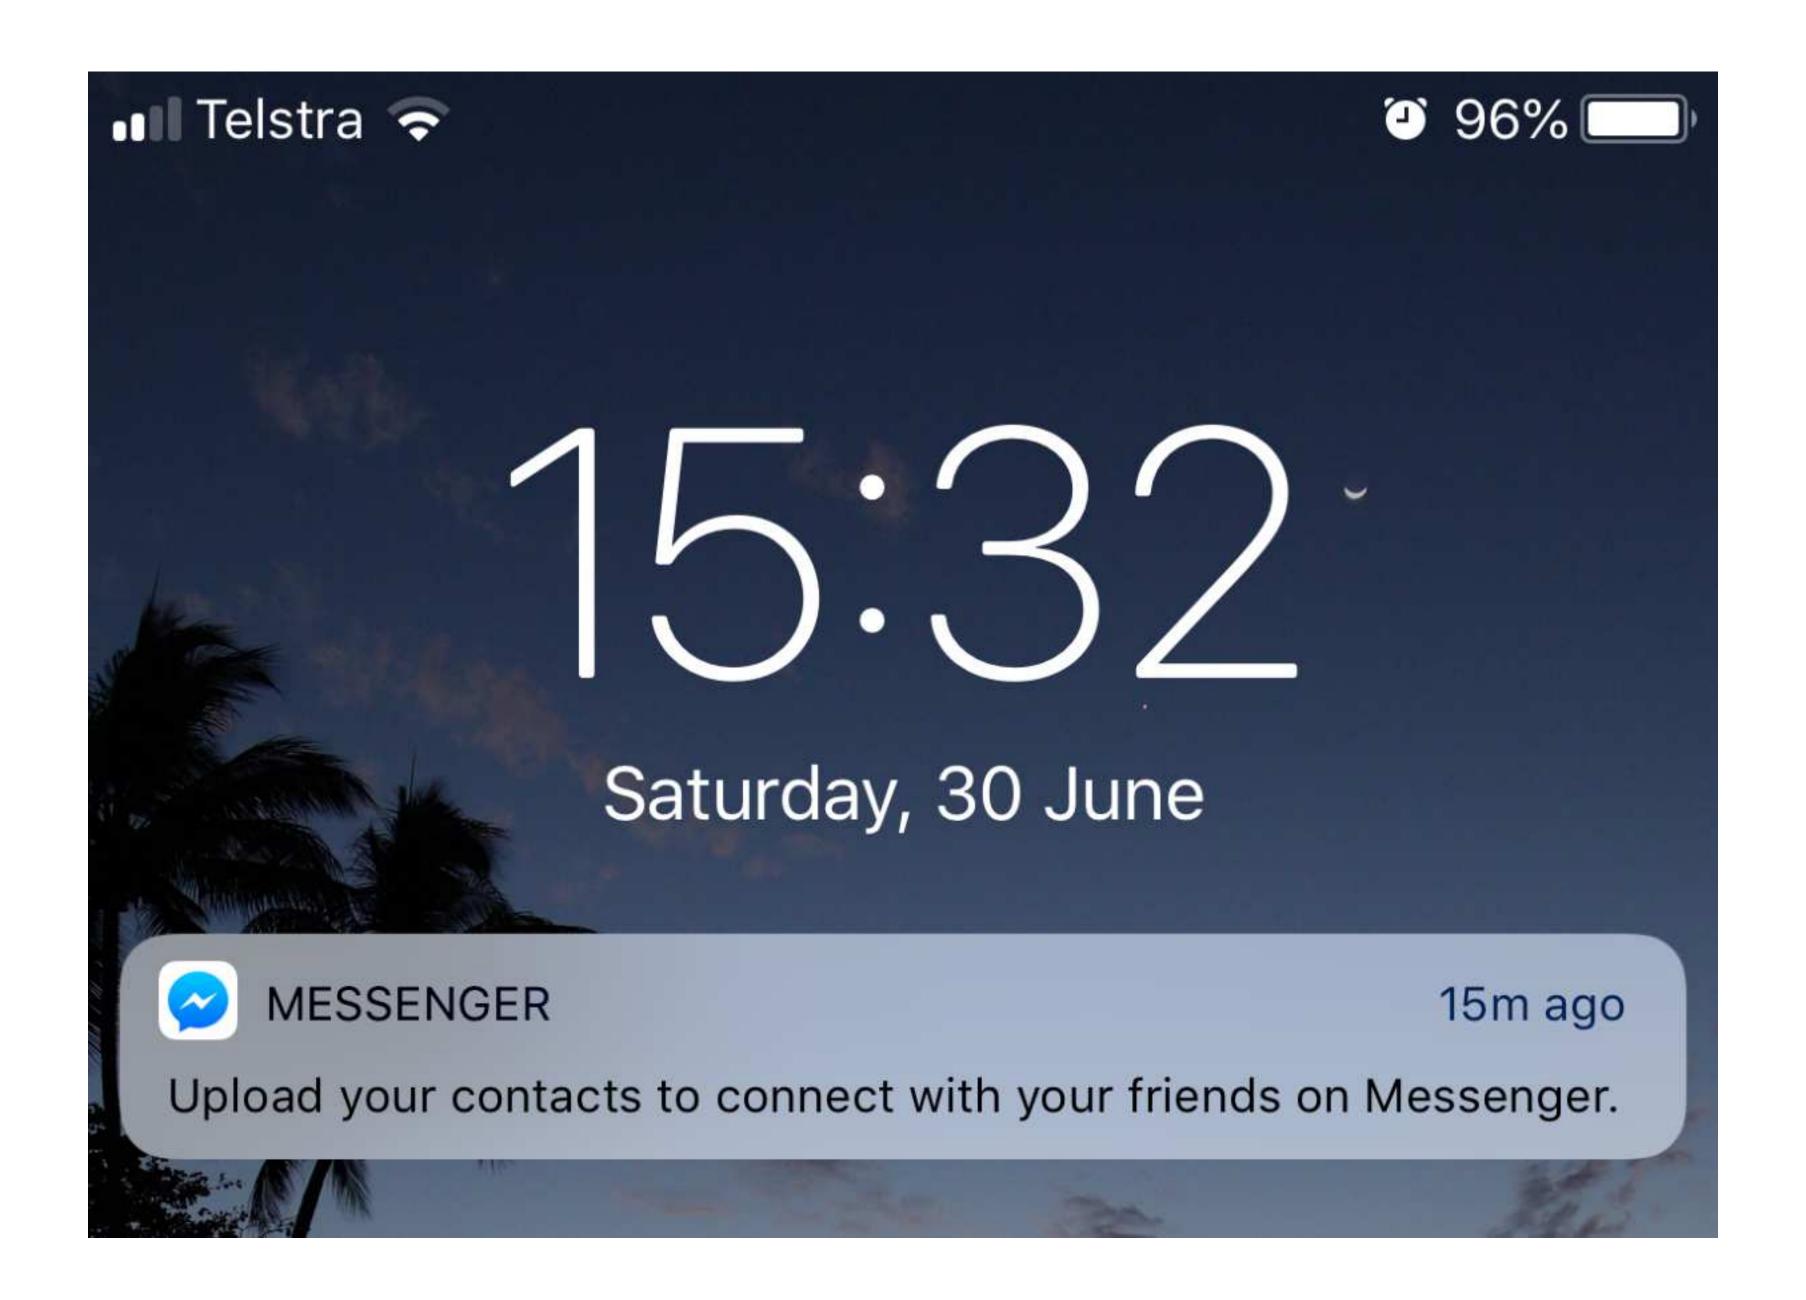

If you skip this step, you'll need to add each contact one by one to message them. Manage your contacts.

This is a Preferred property. They provide excellent service, a great value, and have awesome reviews from Booking.com guests. They might pay Booking.com a little more to be in this program.

The discount is based on the third highest current price of the property for rooms with the same booking conditions in a 20-day window around your check-in date (10 days before and 10 days after check-in date; if less than 10 days are between today and the check-in date, we will use the corresponding number of days after the check-in date to result in a 20-day total). To ensure we are making a fair comparison, we always use the same reservation conditions (meal plan, cancellation policy and room type). This means that you get the same room for a lower price compared to other check-in dates at the same time of year.

David's cheat sheet

If you feel:

- pressure,
- panic,
- confusion, or
- see intrusive or "weird" behaviour...

It's likely a Dark Pattern.

So...

what to do about it.

As a (UI) designer

Think before you design

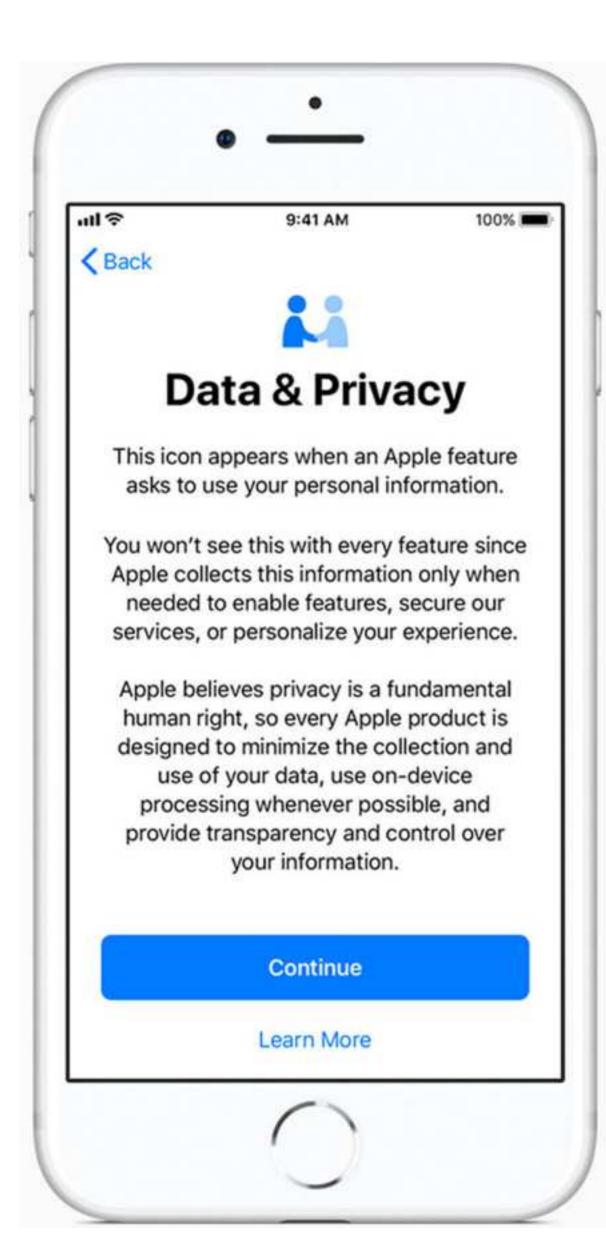

Remember your users

Avoid being (too) metric-diven

Test your UX & design Tricks frustrate users Could affect your image & brand

Being clear makes business sense

You might have to be honest (legally)

ACCC, ACMA, Spam Act, GDPR, etc

Work with your clients/stakeholders

Do unto others

As a user

Be aware

Carefully read *everything* you agree to &

Be prepared to back out
